*Bloomington*— The intersection of Penn Avenue and West 98th Street will be closed starting Monday, August 3, for approximately three weeks with scheduled reopening by August 24. This closure is related to the CenterPoint Beltline Project, which includes the replacement of transmission and distribution gas lines through the intersection.

A detour will be provided for the closure that will use West 90th Street, France Avenue and West Old Shakopee Road. When the closure is removed there may still be intermittent lane closures to complete the work by late August or early September.

For questions regarding the closure and construction, please visit CenterPoint Energy's construction website for this project, entitled Bloomington - Lyndale Avenue S., at <http://bit.ly/1OnbwwP> or call CenterPoint Energy's information hotline at 612-321-5369.
